September water billing is being prepared. Rate increases have gone into effect. Commercial properties that had formerly been assigned as residential will be receiving a credit for the 10,000 gallons per unit that they have already pre-paid for.

Village Hall painting will be completed this week with completion of the painting at the bottom edge of the building. For the painter to repaint the top of the DPW he would require further funds as the building had been approved by the board and he has disposed of the paint.
